NOTES

Key: AED = antiepileptic drug; del-rel = delayed-release; ext-rel = extended-release; ODT = orally-disintegrating tablets

- ¹ Adjunct therapy only.
- ² Temporary alternative to oral therapy.
- ³ Only if refractory to other therapy.
- ⁴ Conversion to monotherapy in adults with partial seizures who are on a single AED (see full labeling).
- ⁵ Also indicated for tonic seizure.
- ⁶ For generalized tonic-clonic status epilepticus.
- ⁷ Other indications include infantile spasms, Dravet syndrome, recurrent seizures, multiple seizure types, cluster seizures (episodes of increased seizure activity), neurosurgically-induced seizures; see full labeling.

Not an inclusive list of medications and/or official indications. Please see drug monograph at www.eMPR.com and/or contact company for full drug labeling.
